

# FACT SHEET

## CUSTOM BEADAZZLED™ FLEXIBLE GLASS BEAD WALLCOVERING

Revised 5/2008

### Substrates and Maximum Dimensions

Design and final dimensions typically dictate substrate. MRC will use the best substrate for your project, unless you have preference. Large-scale murals are paneled, with each panel no larger than maximum width/lengths listed below. Small-scale murals may be produced in one piece and mounted to MDF board if desired. MRC will advise after evaluating the specific mural dimensions.

Class A vinyl (required for photographic reproductions—most murals are done on this ground)

- 36" x 18' (widths up to 36" may be possible--project by project basis)

Class A Non-woven (can be screenprinted upon when matching to standard BD is crucial)

- 28.5" x 18'

FR/UV Stable Translucent Film (for lighting/back lit panels/screens, etc.)

- 23" x 18' (custom sizes possible, please inquire)

MDF board (Class A vinyl applied directly to board and used as artwork)

- 48" x 60"

### Digital File Specifications for Artwork:

- 40 dpi at actual size as a .tiff, .eps, or .jpg file format in CMYK mode.
- Vector art: .eps file format, with all fonts outlined, in CMYK mode
- We use Adobe CS2 (Illustrator/Photoshop) on Mac OS X

*Artwork not provided at these specifications may be assigned additional design fee. Fee will be determined after evaluation of the final artwork. Proof of image copyright is required.*

### Process and Typical Timeline for Custom Beadazzled™ Murals or Patterns

- Email Maria completed custom mural form.
- Project quotation issued by MRC (2-3 business days)
- Quotation accepted by client, 50% deposit due
- Submit art to Tammy with proof of copyright, beaded proof sent for client approval (2 weeks)
- Upon proof approval, mural produced (6-8 weeks)
- Remaining 50% is due before job is shipped. (Shipping is not part of 6-8 wk lead time.)

\*\*\*If a faster leadtime is required, a 25% rush charge will apply\*\*\*
